#1

The graph consists of nodes labeled 1 through 6, arranged in a grid-like pattern. The connections are as follows:

- Top Row:** Node 2 (left) connected to Node 1 (right).
- Second Row:** Node 2 (left) connected to Node 1 (right). Below Node 2 is another Node 2.
- Third Row:** Node 2 (left) connected to Node 2 (right). Above Node 2 (right) is Node 3, which is connected to Node 2 (further right). Below Node 2 (right) is Node 1.
- Fourth Row:** Node 4 (left) connected to Node 4 (middle), which is connected to Node 5 (right). Node 5 is connected to Node 1 (further right). Above Node 5 is Node 3, which is connected to Node 2 (further right).
- Fifth Row:** Node 2 (left) connected to Node 4 (middle), which is connected to Node 5 (right). Node 5 is connected to Node 4 (further right). Node 4 (further right) is connected to Node 6 (far right). Node 6 is connected to Node 2 (further right).
- Sixth Row:** Node 1 (left) connected to Node 2 (middle), which is connected to Node 5 (right). Node 5 is connected to Node 6 (middle), which is connected to Node 5 (right). Node 6 (middle) is connected to Node 4 (left), which is connected to Node 2 (left).
- Seventh Row:** Node 1 (left) connected to Node 3 (middle), which is connected to Node 3 (right). Node 3 (right) is connected to Node 1 (further right). Node 3 (middle) is connected to Node 5 (left), which is connected to Node 6 (middle), which is connected to Node 5 (right).
